

FOLI-R-PLUS
EM-UNE™
 0-6-3
FOR SOIL APPLICATION ONLY

GUARANTEED ANALYSIS:

By Weight

Available phosphate (P ₂ O ₅).....	6.0 %
Soluble Potassium (K ₂ O)	3.0 %
Molybdenum (Mo)	0.003%

DIRECTIONS FOR USE:

FOLI-R-PLUS plant nutrients are recommended for use for all plants. **EM-UNE** is intended to supplement and enhance a full fertilization program as recommended in accordance with reliable Soil and Tissue Analysis. **EM-UNE** provides a source of immediately available nutrients but will not, by itself, provide all necessary nutrients required during the growing season.

Derived From: potassium phosphate and molybdenum sulfate.

EM-UNE TECHNOLOGY:

EM-UNE contains Natural Fermentation and biological extracts. EM-UNE can be used as a soil amendment in crop production. EM-UNE helps in the colonization of roots by the beneficial bacteria and fungi.

BENEFITS of EM-UNE

- biodegradable ingredients.
- Highly effective as a soil penetrant.
- Derived with natural and biodegradable fermentation extracts, surfactants, and emulsifiers.

CONTAINS NON-PLANT NUTRIENT SOURCES: Contains biological and fermentation extracts and non-ionic and anionic surfactants.

Em-Une is recommended for use on all soils. Apply **Em-Une** early in the season, preferably before or during planting

Sprinkler or drip Irrigation: Apply at the rate of 1-2 gallons/acre with irrigation water.
Soil Mark-out Application: Apply at the rate of 1-2 gallons/acre

Field, Row crops and vegetable crops: Apply at the rate of 1 gal/acre at planting or in early spring. Repeat at the same rate 30 days later or as needed.

Potatoes: In-row treatment at time of planting: Use 1-2 gallon/acre. Reapply 1-2 Gal/acre at hilling.

Compatibility: Em-Une is compatible with most fertilizers (including phosphates) and registered pesticides. However, compatibility jar test and small plot test is recommended before large-scale treatments are started. Always refer to products label. **TANK MIXING** Fill the tank with half the water, add **Em-Une** and agitate to dissolve. Add dry formulations and dissolve, follow by liquids. Bring to volume with water. After thorough mixing, allow this mixture to stand for 5 minutes. If the combination remains mixed or can be readily remixed, it is physically compatible. Once compatibility has been proven, use the same procedure for adding products to the spray tank.

CAUTION: This fertilizer is to be used only on crops which respond to molybdenum. Crops high in molybdenum are toxic to grazing animals (ruminants).

IMPORTANT NOTICE TO PURCHASER: Seller's and manufacturer's only obligation to a purchaser or user of this product shall be to refund the purchase price, or to replace the quantity purchased, of any defective product. In no event shall Seller or manufacturer be liable to a purchaser or user of this product for any claim for any economic, indirect, special, incidental or consequential damages, or for any injury, loss or damage, direct or indirect, to any person or property. Purchaser of this fertilizer material expressly acknowledges and agrees to these terms.

Caution: Keep Out of Reach of Children
